Scott Recycling is an Electronics Recycling Service

We specialize in the collection and disposal of PC Equipment (including systems, laptops, peripheral devices, components and cables), Televisions, Monitors, Home Electronics and Metals. We currently offer recycling pick-up services in the Southeastern United States.

So why should everyone recycle?

First, recycling reduces waste. Materials otherwise destined for landfills are reprocessed into new products. By utilizing recycled materials, raw materials such as wood, water and minerals are conserved. And since raw materials are not processed, pollution and greenhouse gas emissions are reduced. Energy is also saved. Recycling aluminum cans saves 95% of the energy used to make new cans from virgin aluminum ore.

But recycling offers more than just environmental benefits. It keeps our communities and natural areas beautiful. It reduces pollution in the air we breathe. It also creates new, well-paying jobs in both recycling and manufacturing industries. Scott Recycling encourages everyone to do their part and recycling. And we will do our part by responsibly breaking down recyclable items and providing the resulting materials to manufacturers for the next generation of products.

- Hard Drive and Data Destruction
- Computer and Peripheral
- Monitor Disposal
- Home Electronics
- Cable Recycling
- Television Recycling

Recycling Collection

We are able to service the vast majority of our enrolled clients at NO CHARGE for pickups. Special needs, such as CRT recycling, facility closures, demolitions, community recycling events, etc. can usually be accommodated as well at very reasonable or no cost.

Recycling Drop-Offs

Scott Recycling also accepts recyclable materials at our warehouse location. Contact us for the address and map to our warehouse location.
